

Having an up to date sign inventory system is important!

- Simplifies budget planning
- Assists in planning work schedules
- Creates efficiency and accuracy in sign management
- Minimizes the amount of time on the road side keeping your workers safe
- Aids in compliance to the minimum retro reflectivity standards.

E-Sign GPS Data Collection Service

A complete database is important in reducing liability exposure. Make sure all your traffic signs are accounted for by using EPIC Solutions for your data collection projects.

We use our **E-Sign Mobile program with GPS** to locate and pinpoint the exact location of your traffic sign inventory.

Information gathered in the field is automatically loaded onto our **E-Sign Web program** that conveniently catalogs and stores information associated with your assets including a complete work history and individual picture

Reduce overhead costs by using EPIC Solutions to collect your data. EPIC Solutions can also transfer existing spreadsheet information into our convenient web based program.

No IT involvement is needed because you do not have to install anything onto your computer.

EPIC Solutions also offers night time visual inspection services for cities, counties, and townships that already have an inventory system in place.

Why Have EPIC Solutions Do Your Data Collection?

- **ACCURACY** – Our systems assure accurate initial information that is crucial to eliminate any potential future problems.
- **EFFICIENCY** – Timely completion is needed to meet the new retro reflectivity requirements of the MUTCD.
- **SAVINGS** – Our crews are trained and experienced. Keeps your staff on current work duties and schedules. Why train for a one-time event?

EPIC Solutions is committed to being technology leaders in the highway construction, roadway maintenance, and related industries. We build high quality machines to fill a need, that are safe and improve efficiency. Developed and road tested with the participation of industry experts, these products will perform for you.
