

Polyurethane Solutions

Powerful polyurethane
equipment.

www.epicsolutions.us

The PL6000 Skid Applicator fits in any standard size pickup box, with a footprint of 4.5' x 6'.

HEATED MATERIAL TANKS ARE STANDARD

Meet the new standard

EPIC MANUFACTURING

is focused on bringing customers the best equipment solutions, along with the customer service required to support what we sell. In addition, our engineering focused approach allows us the ability to provide in-house integration of our equipment with our customers' unique requirements.

As a manufacturer of polyurethane equipment, we provide solutions for above and below ground poly spray applications. We're also an authorized Graco sales and service center to aid in maintenance and repairs of

your current poly equipment.

The friendly people at EPIC Manufacturing are happy to assist you with any problems that you are having in the field, or if you need further information about our quality products. Contact us by email at info@polyfoamequipment.com or phone during regular office hours.

Our Products and Services

PL1000 Truck System

Fully equipped with reliable Graco pumps, GX-7 guns, and temperature controlled hoses. Components are mounted inside a weatherproof van on a customer supplied chassis.

PL5000 Mobile Track Rig

Key features include 30 gallon heated material tanks, 36,000 BTU furnace, and can be powered by propane or gasoline. Leaves minimal ground impact on the environment.

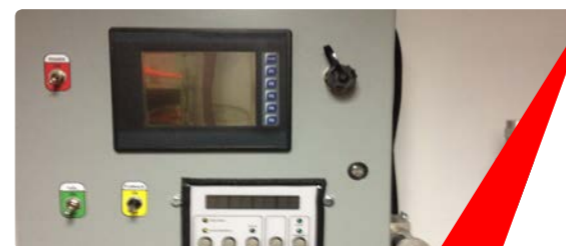

PL6000 Skid Unit

Automatic temperature control for each material and fits in any standard size pickup box. Powered by a 20 HP Kubota diesel engine paired with a Webasto furnace creates an efficient and reliable package.

Graco Sales and Service

Epic Manufacturing is an authorized dealer of Graco guns, proportioners, reactors, parts & accessories.

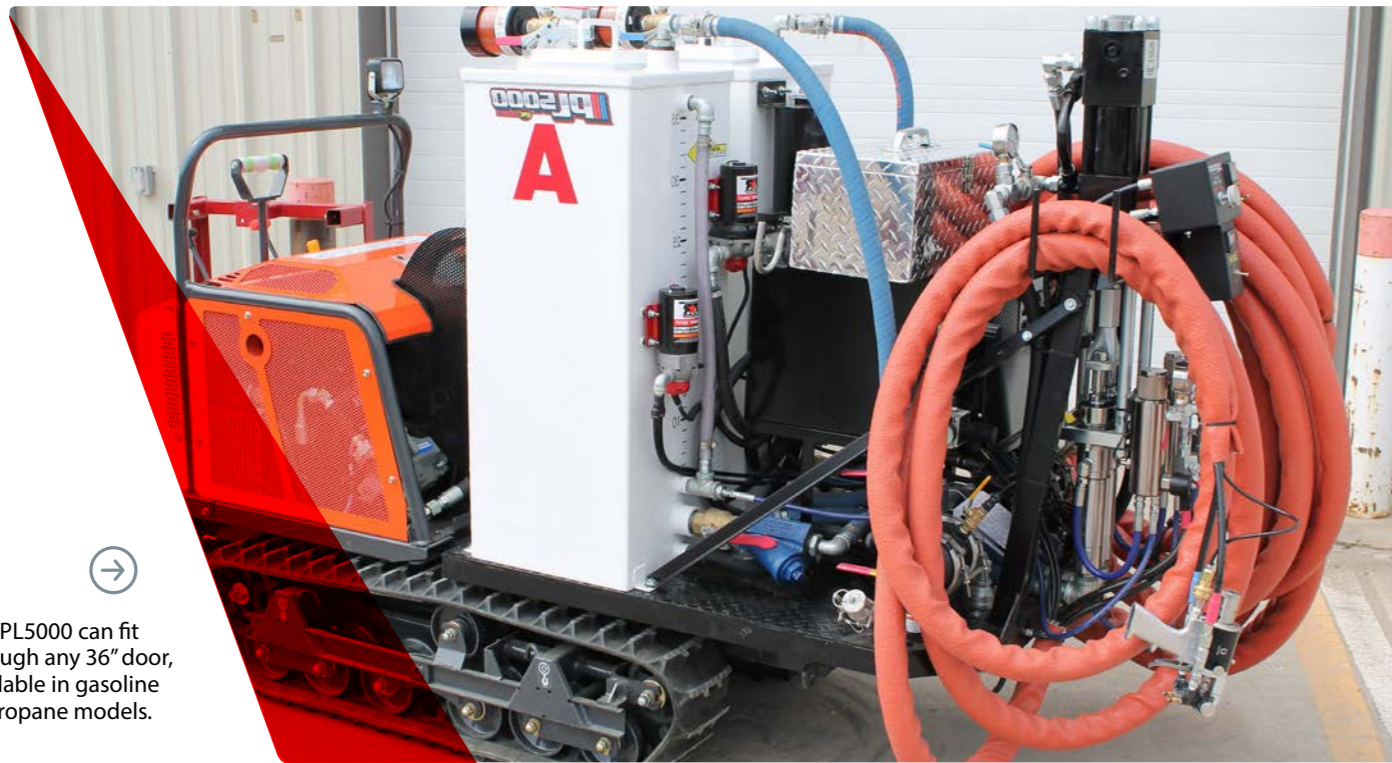

M7 Material Monitoring

- Records material used (lbs and gallons)
- Displays temperature as dispensed from gun
- Data logged on excel reports
- Report prints from back of truck

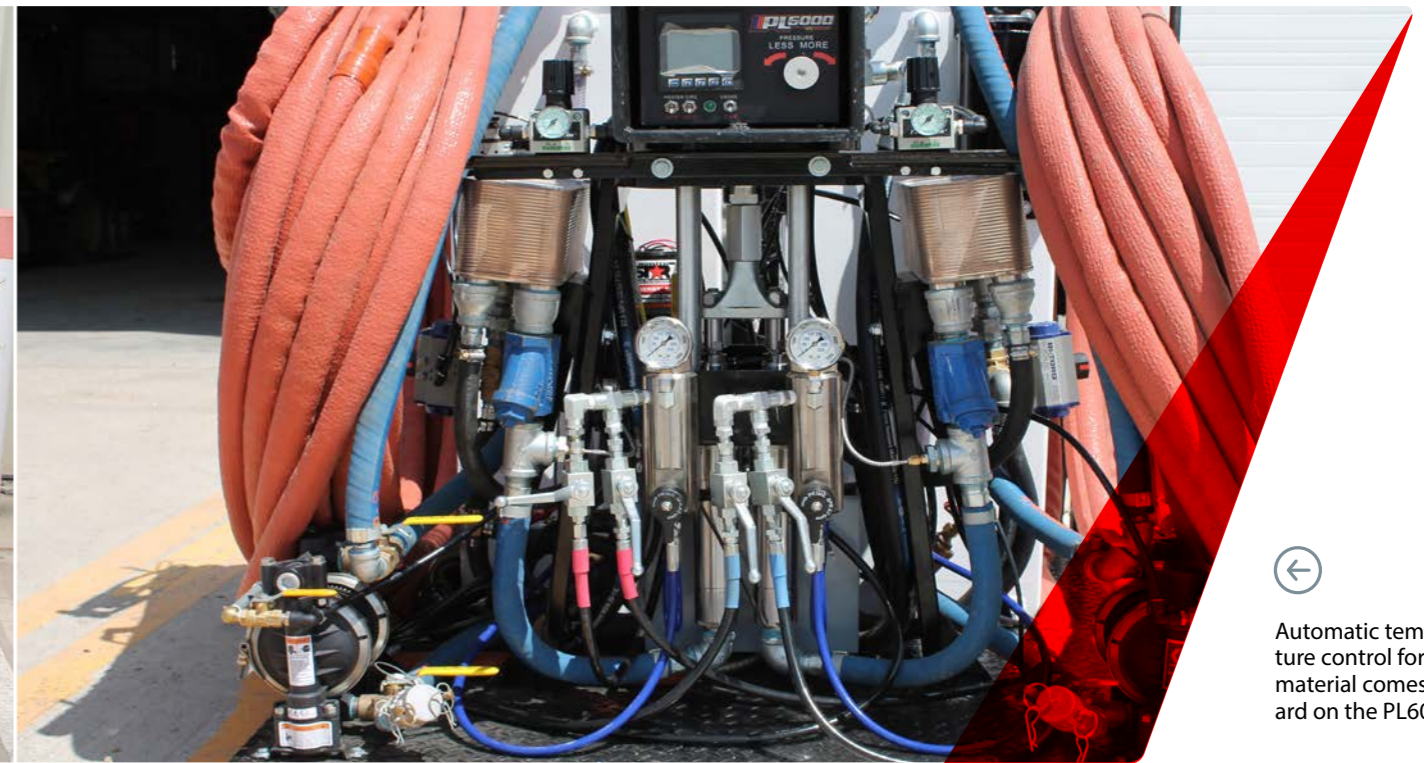

Pump Repair

Providing the poly industry with reliable pump repair and service.

The PL5000 can fit through any 36" door, available in gasoline or propane models.

Automatic temperature control for each material comes standard on the PL6000.

PL5000 Mobile Track Rig

The PL5000 Mobile Track Rig is our most popular package consisting of quality components mounted on a Canycom SC 75 track drive unit with the option of running on gasoline or propane. Powered by a Subaru V-Twin engine, electronic ignition, aluminum alloy block with cast iron cylinder liners, and a full pressure lubrication system with trochoid-type oil pumps are features that come standard with every machine.

Components:

- (50') Temperature Controlled Hose
- Furnace with temperature controller
- (2) 30 Gallon Heated Material Tanks
- (2) ¾" Husky Diaphragm Pumps
- (1) Graco Hydrocat 6 GPM Pump
- (2) GX-7 Graco Guns
- (2) Desiccant Filters
- (2) 2 ½" Low Pressure Strainers
- (2) High Pressure Graco Strainers
- (2) Heat Exchangers
- (1) 13 CFM piston air compressor
- (2) Propane Tanks
- (1) 12 GPM Hydraulic Pump
- Pressure Gauges
- Temperature Sensor
- Operation Manual

PL6000 Skid Unit

Epic's PL6000 skid unit was designed with user portability in mind. Mounted on a 4' x 6.5' steel foundation, contractors can move this compact polyeruthane applicator just about anywhere they choose.

The 20hp Diesel Kubota engine packs plenty of power and reliability to get the job done right.

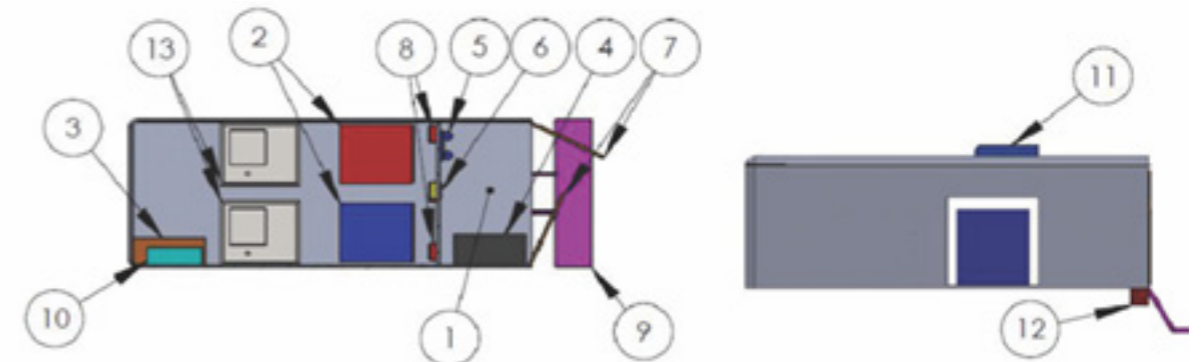

Components:

- Powered by a 20hp Diesel Kubota
- (150') Temperature Controlled Hose
- Fully Automated Temperature Control for Each Material
- Webasto Diesel Powered Furnace
- (1) 13 CFM Piston Air Compressor
- (1) 12 GPM Hydraulic Pump
- (2) 2 ½" Low Pressure Strainers
- (2) ¾" Husky Diaphragm Pumps
- (1) Graco Hydrocat 6GPM Pump
- (2) GX-7 Graco Guns
- (2) Desiccant Filters
- (2) High Pressure Graco Strainers
- (2) Heat Exchangers
- Material Usage Counter
- Pressure Gauges
- Temperature Sensor
- Operation Manual

EPIC is a Fargo, North Dakota based manufacturing company that provides development of equipment, sales, and service for the application of polyurethane spray foams..

1) Workspace, 2) Spare Totes, 3) Toolbox-workbench, 4) Compressor-Generator, 5) Pumps, 6) M7 Monitoring System, 7) Hose Hanger, 8) Heat Exchange, 9) Deck, 10) Cabinets, 11) AC/Heater, 12) Furnace, 13) Heated Tanks

Interior/Exterior designs vary depending on dealer specifications.

PL1000 Truck Package

THE PL1000 truck package features a simple, efficient design that can help your company save time and money through its ease of use.

Complete System enclosed in an insulated van body to be mounted on customer supplied truck chassis

- Aluminum skin/interior height 7' 6" seamless
- (2) 60" Tote Access Side Doors
- (2) Rear Access Barn Doors
- (1) 36" x 84" Front Side Door
- (2) Hose Hangers
- (1) (200') Temperature Controlled

Hose

- (1) (100') Temperature Controlled Hose
- Insulated Walls/Ceiling/Floors
- Air Conditioner (13,500)
- 80,000 BTU Furnace
- Siemens 100amp electrical panel
- (3) Exterior Weather Proof Outlets
- (2) Interior Outlets
- Overhead Lights
- (2) 12V LED Lights
- 36" Overhead Cabinet
- 36" Work Bench
- (2) Permanent Heated Material Tanks
- Graco RPS2900 Pump

- (2) Graco 1590 Husky Transfer Pumps
- (2) GX-7 Graco Guns
- (1) Desiccant Dryer Kit
- (2) Heat Exchangers
- 40 cfm rotary screw air compressor
- 10 KW Diesel Generator
- 19 GPM Hydraulic Pump
- Pressure Gauges
- Temperature Sensors
- Accessories
- Eye Wash Station
- Fire Extinguisher
- First Aid Kit
- Operation Manual

Packages come complete with diamond plated interior wall skins and work space.
