## TA5000 TAPE APPLICATOR

The EPIC Solutions designed and built TA5000 Tape applicator is the most efficient and functional automated tape applicator on the market today! The TA5000 automatically cuts tape without having to stop. The programmable timing system eliminates having to measure out patterns. Just get lined up at your starting point, hit the button and GO! There are hundreds of customers using this machine with millions of feet of tape applied to date.

### Customer Testimonials

*"We completed 14 miles of 7" Contrast (10' - 40' skips) in 8 hours. This is the BEST tape machine by far than any out there. I've been doing this a very long time and have NEVER done this amount of tape in their short amount of time with zero problems! If you have any customers looking to buy one and need to talk to a contractor, tell them to call me!"*

Danny Puffer ~ Southern Synergy / LA

We finished 56 miles of 7" Contrast (150' rolls) in 5 DAYS. The Epic TA5000 completed a project that should have been "tape-truck applied". We went though a roll every 2 min 10 sec and it took :30 seconds to change out rolls. This machine paid for itself very quick!

Kelly Dalehite ~ Pavement Marking LLC / LA
